

Professional Engineers and Geoscientists Newfoundland and Labrador
December 20, 2017

Congratulations to PEGNL's Newest License Holders

On December 14th, Professional Engineers and Geoscientists Newfoundland and Labrador recognized six newly licensed Professional Engineers and one Professional Geoscientist at a Connections East event.

“It is inspiring to see a group of young individuals become licensed professionals in their respective fields of Engineering and Geoscience. Licensure provides these individuals with a sense of accomplishment and achievement but also comes with great responsibility. At PEGNL, we are optimistic that these young professionals will positively contribute to their professions and to our province.”

-Gerard Dunphy, P. Eng., Chair of Board of Directors of PEGNL

Their license certificates were distributed on Thursday, December 14th, at the Connections East Christmas Luncheon which was held at the Johnson Geo Centre. For a listing of all newly licensed professionals in 2017, as well as, a listing of Geoscientists-in-Training and Engineers-in-Training registered in 2017, please see the backgrounder below. These individuals now join PEGNL's approximately 5100 license holders.

From left to right in the photo: Darren Andersen, P. Eng., Kyle Critch, P. Eng., Joanne Norman, P. Eng., Carmichael Polonio, P. Eng., Erin Daly, P. Eng., Michael Gregory, P. Eng., and Francis Ryan, P. Geo.

In all Canadian provinces and territories, engineers must be licensed in order to practice. With the exception of PEI and Yukon, all other jurisdictions also require licensure of geoscientists. In Newfoundland and Labrador, registration is mandatory for anyone practicing engineering or geoscience as defined in the *Engineers and Geoscientists Act, 2008*.

To become licensed professionals, both engineers and geoscientists must meet academic requirements; pass the national professional practice and ethics examination; have obtained at least four years of relevant working experience (internship) under the supervision of a licensed professional, including at least one year of equivalent Canadian experience; be of good character, and be proficient in English. All licensed professionals must also continue to participate in professional development throughout their careers.

BACKGROUNDER

Below is a list of PEGNL's newly licensed professionals, as well as a list of newly registered Engineers-In-Training and Geoscientists-In-Training, as of December 14, 2017.
