POSITION AND RESPONSIBILITIES

You will be responsible for daily supervision of the mine engineering team and for providing direction to contractors. As well, you will provide support for ground control, ventilation and technical services. With safety as your core value, you will focus on high quality results and provide direction and guidance to ensure that planning is in place to achieve short and medium-term development and mine production targets.

EDUCATION AND QUALIFICATIONS

Requirements of the position:

- Bachelor's degree in mining, geological, geotechnical, civil or mechanical engineering
- 7 to 12 years of progressive mine engineering and supervisory experience
- Equivalent combination of education and work experience will be considered
- You must be eligible for registration with the Association of Professional Engineers and Geoscientists of Saskatchewan (APEGS)

Assets:

- Strong communication, leadership, planning and organizational skills

The McArthur River operation, which is located in northern Saskatchewan, operates on a rotational schedule. Employees commute to the operation by aircraft from designated locations in Saskatchewan.
