

Rio Tinto

Senior Engineer - Electrical - LAB000VX

Primary Location Labrador City
Schedule Full-time

Iron Ore Company of Canada

Rio Tinto is a leading international mining group headquartered in the UK, combining Rio Tinto plc, a London and NYSE listed company, and Rio Tinto Limited, which is listed on the Australian Securities Exchange. Rio Tinto's business is finding, mining, and processing mineral resources. Major products are aluminum, copper, diamonds, energy (coal and uranium), gold, industrial minerals (borax, titanium dioxide, salt, talc) and iron ore. Activities span the world but are strongly represented in Australia and North America with significant businesses in South America, Asia, Europe and southern Africa. For more information, please visit www.riotinto.com.

IOC is a leading Canadian producer of iron ore concentrate and iron ore pellets serving customers worldwide. The Company operates a mine, concentrator and a pelletizing plant in Labrador City, Newfoundland and Labrador, as well as port facilities located in Sept-Îles, in the Province of Quebec. It also operates a 418-kilometer railroad that links the mine to the port. IOC has 2200 employees and its major shareholder and operator is the international mining group Rio Tinto, which has activities in more than 40 countries throughout the world.

Reporting to the CEP2 Project Manager, the Senior Project Engineer, Electrical is accountable for leading the Labrador City Expansion Projects engineering team through the implementation of the spirals portion of the Concentrate Expansion Project Phase 2 and subsequent future projects.

The primary accountabilities of this role include:

- Meeting with various stakeholders to ensure project deliverables meet expectations and are clearly defined.
- Leading the development of project deliverables including schedule, cost estimate and engineering.
- Leading the on-site design team consisting of junior engineers, drafting technicians, company representatives and consultants through the entire life cycle of the CEP2 Spirals project.
- Reviewing and approving the work completed by the on-site design team.
- Managing the implementation phase of the project by overseeing the tracking of schedule, cost and safety performance as well as providing on-site technical support during construction.
- Managing engineering consultants during the detailed engineering phase of the project if required.
- In addition to the Spirals work, providing technical assistance to owner's team on the rest of Concentrator Expansion Project through the review of drawings and specifications prepared by Bechtel.
- Suggest improvements based on lessons learned from recent completed projects within the concentrator.

The position is based in Labrador City.

The ideal applicants will:

- Hold a Bachelor of Engineering (Electrical).
- Masters Certificate in Project Management
- P.Eng designation from PEG-NL will be considered an asset.
- 5-7 years experience in a similar role

Candidates interested in applying for this position are invited to make an online application before January 31, 2012
