

Over the past 30 years, Allnorth has grown significantly into a multidisciplinary engineering and technical services consulting company. Proudly Canadian, our head office is located in British Columbia with multiple offices across Canada. We serve as a single source for our clients to find innovative, practical solutions for their project needs.

At Allnorth, we strongly believe that providing successful client relationships and delivering the best service in our industry is the key to our success. We are fortunate to have developed extensive experience and strong relationships in the Mining, Oil & Gas, Pulp & Paper, Chemical, Power, Civic, and Transportation sectors.

We are passionate about continuing to build our company and providing our people, partners and clients the opportunity to grow and succeed through local offices. Being part of this growth story and working in an ambitious and professional team culture is what makes Allnorth a career destination.

ELECTRICAL & INSTRUMENTATION ENGINEERS **Vancouver, Surrey, Nanaimo, Prince George, BC**

We have senior and intermediate level positions for electrical and instrumentation engineers available immediately. Successful candidates will be responsible for the project proposals, work scope and cost estimates, preparation of industrial electrical, control and instrumentation designs and related documents. Other duties include project management, preparation of procurement specifications and test plans, vendor document reviews, construction supervision and participating in the commissioning of systems.

You will be involved in all stages of the projects, from inception to completion with opportunities to lead the project teams. You will also coordinate designs with external consultants and contractors and continually foster and grow strong relationships with our clients.

KEY QUALIFICATIONS:

- Bachelor's degree in Electrical Engineering;
- Must be registered, or eligible to register, as a Professional Engineer (P.Eng.) in British Columbia; Registrations in other provinces are an asset;
- Minimum 7 years of experience in an industrial design, plant and/or construction environment;
- Proficient in engineering software applications such as database tools, AutoCAD, ETAP;
- Thorough understanding of codes, governing regulations and industry practices;
- Excellent communication skills (interpersonal and written);
- Proven leadership skills and ability to collaborate with team members in a multi-disciplined environment;
- Technical competence and strong attention to detail.

Join the innovative and energetic team at Allnorth, and get what you want from your career. In addition to a competitive salary and benefits packages, we offer real advancement potential within a team environment where outstanding performance is rewarded. You won't get lost in the numbers here, but rather enjoy positive guidance as you learn, grow and create an impact.
